COMMUNITY PROJECT FUNDING

TOTAL: \$41,268,230

AMOUNT	RECIPIENT	PROJECT	DESCRIPTION
\$13,736,573 2024 Community Project Funding			
\$3,000,000	Epworth Children and Family Services	Epworth Emergency Shelter and Food Pantry Rehabilitation Project	This funding will rehabilitate the basement of Epworth Food Pantry's 7500 Natural Bridge location, including installing new HVAC and Refrigeration units, and would also help remodel the second floor of the building into a short-term emergency shelter that serves runaway and homeless youth.
\$1,666,279	St. Louis Housing Authority,	St. Louis Housing Authority (SLHA) Clinton-Peabody Redevelopment	St. Louis Housing Authority's Clinton-Peabody Redevelopment project would renovate the buildings at Clinton-Peabody, built in 1942, into modern, sustainable, and long-term affordable housing options for residents.
\$1,108,000	U.S. Army Corps of Engineers	City of University City Detention Basin Project, U.S. Army Corps of Engineers	U.S. Army Corps of Engineers City of University City Detention Basin Project would use support the construction of an 8-acre detention basin. The detention basin would assist in lowering the instances of severe flooding in University City, Overland, and other downstream communities, which would mean reduced injuries and death, property damage, economic losses, and environmental impacts.
\$1,000,000	Urban Strategies, Inc.	Urban Strategies - Murphy Park Housing and Site Improvements	Urban Strategies' Murphy Park Housing and Site Improvements project would use this funding for renovations to bring 91 units back online and increase access to quality affordable housing in our community.
\$900,000	Perpetual Group Home for Veterans	Perpetual Care Group Home for Veterans Independent Veterans Community Project	Perpetual Care Group Home for Veterans' Independent Veterans Community Project will construct the Perpetual Care Group Home for Veterans to provide a safe, environment for our wounded and aging veterans.
\$850,000	Youth in Need	Bright Futures: Youth In Need Project for Youth Homelessness Prevention	Bright Futures: Youth in Need's Project for Youth Homelessness Prevention would use this funding for site acquisitions and renovations to provide a broad range of supporting services related to employment, education, housing navigation assistance, and counseling to homeless youth.
\$850,000	Doorways-St. Louis	Energy Efficiency and Accessibility Renovation of the Cooper House Assistive Living Facility for People Living with HIV Unable to Live Independently Project	Doorways-St. Louis will use this funding for energy-efficient renovations to their accessible housing facilities for people recovering and receiving care for HIV.
\$850,000	Healthy Food Healthy Community	Operation Food Search Inc. Healthy Community Renovation Project	Operation Food Search: Healthy Food, Healthy Community Renovation Project would use this funding to increase the amount of fresh foods it can procure, store, and distribute to food insecure individuals living in economically distressed areas of St. Louis City, St. Louis County, and surrounding counties in Missouri and Illinois.
\$850,000	Refuge & Restoration (R&R)	R&R Marketplace Economic Development and Revitalization Project, City of Dellwood, St. Louis County, Missouri	Refuge & Restoration's Marketplace Economic Development and Revitalization Project will rehabilitate and make capital improvements to provide critical economic development and revitalization, including renovation of a 20-year blighted 90,000 square-foot building in the center of the City of Dellwood with a workforce training center with career pathways, small business support center, and early childhood education center.
\$696,294	Youth and Family Center	Youth and Family Center Facility Improvement Project	The funding would be used for renovations to enable the Youth Family Center to provide a safe environment for youth.
\$500,000	Easterseals Midwest	Easterseals Midwest Employment and Disability Services Workforce Training Cente	Easter Seals Midwest Employment's Disability Services Workforce Training Center would use the funding for site acquisition and renovations. This center will provide job training and continuing education to more than 800 disability service professionals and comprehensive employment services for more than 900 individuals with developmental disabilities.
\$500,000	Jurnee Foundation	Jurnee Foundation Glasgow Village Affordable Housing	Jurnee Foundation Glasgow Village Affordable Housing will use this funding to renovate and bring housing resources to 68 families in the Glasgow Village neighborhood.
\$500,000	LCRA MET Center	LCRA MET Center Capital Upgrades for Workforce Development	LCRA will use these funds to renovate and modernize the MET Center building in order to ensure the LCRA can continue to deliver and grow the workforce development services of the MET Center to support the community.
\$466,000	Gateway 180 Homeless Services	Gateway180 Family Emergency Shelter Weatherization & Safety Project	Gateway 180's Family Emergency Shelter Weatherization & Safety Project will make necessary upgrades to the areas and structures of their building that are currently damaged, out of date, or non-existent, as well as improve the energy efficiency of their shelter building.

\$18,362,457 [2023 Community Project Funding](#)

\$3,000,000	Power4STL	Mound City Medical Healing Center	Power4STL's the T: Harm Reduction Center will provide healing resources to communities previously subjected to unprecedented loss of life due to opioid overdose and violence, with death disproportionately impacting the lives of the Black community. This includes a holistic approach to harm reduction through direct service, utilizing a team of community health workers and advocates, trauma responsive clinicians, and numerous mobile and in person services and resources. This new comprehensive harm reduction center will allow the co-location of clinical, mental health, social, spiritual, and healing care as well as crisis support. This community of health will serve to bridge the fatal gaps in healthcare and healing for those at risk for violence and overdose. St. Louis sits at the frontier of the modern civil rights movement and The T sits within that vast landscape at the frontier of anti-racist medicine and community healing. What has been a source of great pain can become the center of great healing. We believe great things can occur when we heal. The T is committed to promote that healing in every way possible for St. Louis, for the people, and for the culture.
-------------	-----------	-----------------------------------	---

\$3,000,000	Better Family Life	Better Family Life's LifeHouse Phase I of the Page Revitalization Initiative	The LifeHouse Phase 1 of the Page Revitalization Initiative at Better Family Life will not only revitalize North City, but educate and support the residents in securing a beautiful safe home and equip them with the knowledge and financial stability to remain in their home. This project encompasses three specific, but vital areas that will support local community growth and overall health: 1) Development of 48 units of residential living opportunities (single family and/or condominiums) for moderate and lower income families; 2) Creation of a community based planning document that will establish priorities for the area, and; 3) Community capacity building through resident education and engagement; Each of the three areas is a vital strategy for a cohesive, self-reliant and resilient community.
\$2,423,000	Covenant House Missouri	Center for Economic Advancement at Covenant House Missouri	The Covenant House Missouri project will be a hub for holistic economic development programs to help marginalized youth obtain education, establish the hard and soft skills needed in the workplace, gain financial education and empowerment, connect to mentors, and promote social capital in the spirit of achieving a lifetime of independence and success. CHMO is proposing the renovation and revitalization of 40,000 sq. feet of property at 5017 Maffitt Ave in the Kingsway West Neighborhood in North St. Louis that has not been in use for over 20 years. Transforming this space will further promote and expand the workforce development programs and partnerships, which CHMO already offers to youth who are at-risk of or experiencing homelessness, which will impact youth and the community for generations to come.
\$1,812,891	Child and Family Empowerment Center	LIFE Housing Project	The LIFE Housing Project at the Child and Family Empowerment Center will fund the LIFE (Life Improvement/Family Empowerment) Housing Project. The LIFE Housing Project addresses the housing disparities in North St Louis City and North St. Louis County, MO. The LIFE Housing project serves people ages 18 and older who have been diagnosed with a mental health disorder and focuses on people with a substance use disorder. CAFE receives referrals from area SUD treatment Centers, Behavioral Health Providers and Recovery Support Organizations. The project will house approximately 75 men, women, and their children in North St. Louis City.
\$1,498,853	A Red Circle	A Red Circle - North County Community Nexus	The A Red Circle project will encompass site acquisition and renovations to provide services to meet immediate and long-term needs of North County residents who have borne a historic and persistent lack of access to good education and jobs, safety, healthy food access and other opportunities necessary to survive and thrive. This project restores a blighted property that has been vacant for over 10 years, provides essential revenues to a primarily Black community that has faced disinvestment for decades, and addresses priority concerns of food security to promote healthy outcomes for residents. It also provides much needed space for community service programming like our co-located STL Mutual Aid services, affordable open space for homegrown small businesses, and will provide a needed cold storage and distribution site for a growing Good Food Movement with local urban Black farmers in North County. The grocery store will feature locally sourced produce and other high-demand items, a cold storage and distribution facility for the growing network of black urban farmers in North County, a commissary kitchen, and a community education space for teaching about nutrition and healthy foods.
\$1,000,000	SSM Health - St. Mary's Hospital - St. Louis	SSM Health - St. Mary's Hospital - St. Louis, MO for Facilities and Equipment	SSM Health St. Mary's Hospital St. Louis's Behavioral Health Urgent Care Long Acting Injectable Clinic will provide alternative treatment options for adults and adolescents who have trouble consistently taking their daily/regular antipsychotic or addiction medications. The clinic will provide patient's medicine through a single injection that steadily releases medication over several weeks. It will provide this resource within MO-1, preventing patients from having to travel greater distances to existing facilities and helping address inequities and gaps in care. Schizophrenia and addiction are examples of conditions treated, and medications administered include antipsychotics and medications to treat opioid and alcohol dependence. Through the treatment, patients have regular connection with on-site social workers, enabling them to address social determinants and to establish peer and family connections amongst patients.
\$1,000,000	UAW Labor Employment and Training Corporation	UAW Labor Employment and Training Corporation, St. Louis, MO for Job Training in the Automotive Services Industry	The UAW Labor Employment and Training Corporation will create a premier Automotive Repair Training center in the St. Louis Metropolitan area to provide basic and advanced automotive technology training to unemployed, underemployed, and incumbent workers thru UAW Labor Employment and Training Corporation (LETC) leading to middle & high skilled employment utilizing Apprenticeship models and career pathways in the changing automotive technology industry. An estimated direct annual economic impact is \$4.20 million to the region.
\$990,000	St. Louis Housing Authority	Public Wi-Fi for St. Louis Housing Authority Residents	The Wi-Fi for Housing Authority Residents project will connect 600 households in six St. Louis Housing Authority developments to high-speed internet by installing a private LTE network and providing residents with devices (i.e. chromebooks, tablets), technical support and elementary digital literacy services.
\$750,000	Boys and Girls Club of Greater St. Louis	Boys and Girls Clubs Capital Projects	The Boys and Girls Clubs Capital Projects will renovate and do capital improvements needed in order to safely house and expand after- school, weekend and summer programs for youth ages 5-18.
\$750,000	City of Kinloch	City of Kinloch Dunbar Gardens Renovations	The Dunbar Gardens project in the City of Kinloch will help facilitate the renovation of an apartment complex aimed at providing affordable housing for senior citizens and the underserved.
\$750,000	Urban League of Metropolitan St. Louis	Urban League Plaza Property Improvements	The Urban League Plaza invests in the restoration of the property's exterior and revitalization of its interior in preparation to house African-American owned small business enterprises. The plaza is designed to provide space that is quality, affordable, and sustainable. Funding will be used for renovations and capital improvements.
\$685,000	City of St. Louis	Improvement of 911 Dispatch System	The 911 Dispatch System project for the City of St. Louis will support a technology upgrade to the CAD system to modernize and centralize the City's emergency response system in line with national best practices.
\$380,000	Seed St. Louis	STEM education programs	Seed St. Louis will offer support to, expand, and build school gardens and orchards, while also building a student & teacher destination children's garden for learning and exploration.

\$252,713	Saint Louis Public Schools	CTE programs in Construction Trades, including scholarships for technical college program.	The St. Louis Public Schools project will offer academic and career-oriented courses to transition from high school to a career. SLPS offers 27 distinct Career and Technical Education tracks, which students enroll in as juniors and seniors, but begin to be exposed to as early as middle school. The program relies on deep partnerships with industry, unions, and community college partners to ensure that students have a path to a career. This project makes new opportunities available to students in grants 6-12 as they explore construction trades in age-appropriate ways.
\$70,000	Girl Scouts of Eastern Missouri	Student mental health and anti-violence programs	The In-School Mental Health & Anti-Violence Programming from the Girl Scouts of Eastern Missouri will serve elementary students (all genders) in grades K-5, Be a Friend First that serves girls in grades 6th-8th grade, and Transform Ur Future for high school students and each addresses critical issues that students face at each stage of their social and emotional development and helps them navigate them calmly and constructively.
\$9,169,200	<u>2022 Community Project Funding</u>		
\$2,000,000	Affinia Healthcare	Construct and Operate New Community Health Center with YMCA of Greater St. Louis	Affinia Healthcare is making plans to collaborate with the YMCA of Greater St. Louis to construct and operate a new community health center at 3930 Pershall Road (63135), located in the City of Ferguson, a municipality in North St. Louis County. In the new facility, to be located adjacent to the Emerson YMCA, we will offer a wide range of primary care services in highly-underserved areas of the St. Louis region, including medical, dental and behavioral health/substance use services and enabling services. Since there is currently not a comprehensive primary care health center in this area, all of these services will be new. The facility will be approximately 15,000 square feet in size and projected to serve approximately 6,700 individual patients per year.
\$1,000,000	CareSTL Health	The Ville Wellness Campus	CareSTL Health is proposing a bold vision with a project designed to provide COVID-19 services as part of established COVID-19 National Federal Objectives. The Ville Wellness Campus (VWC) anchored by a 46,000,000 SF State-of-Art Federal Qualified Health Center, will put abandoned LRA property back into productive use, remove decades of blight, combat persistent crime, provide much needed services to remediate unhealthy lifestyles contributing to chronic levels of hypertension, diabetes, mental illness, and addiction. Additionally, the new facility would replace the current facility, which is laced with asbestos, functionally obsolete, and unable to handle current and future pandemics.
\$1,000,000	Harris-Stowe State University	Minority Entrepreneurship Collaborative Center for Advancement (MECCA)	The focus of MECCA is to be deliberate and intentional in fostering the growth of emerging entrepreneurs and cultivating the next generation of business owners from underserved communities. Within MECCA, HSSU will further the Minority Business Enterprise by helping budding entrepreneurs move their ideas from concept to commercialization. There is an urgent need within the St. Louis metropolitan area to address the unmet needs of low-and moderate income individuals by providing education and consulting for startup businesses. This will be realized by facilitating hands-on educational training and services to complement formal classroom learning in a state-of-the-art entrepreneurship center for Harris-Stowe State University students and the community at large. As an anchor institution, Harris-Stowe will accomplish this task by driving inclusive economic activities and creating synergistic innovation within the St. Louis region.
\$1,300,000	Assisted Recovery Centers of America and the City of St. Louis Circuit Attorney's Office	The Healthcare-based Crime Intervention Clinic	The Healthcare-based Crime Intervention Clinic is a resource embedded within the Circuit Attorney's office in partnership with Assisted Recovery Centers of America. The 22nd Circuit courts can be effective access points to address the racial disparities and inequities that fuel the criminal justice system. The promotion of racial and social justice and healthcare for all people with mental health, and substance addiction disorders generational trauma, lack of access to housing, economic instability, food. Crime viewed through a public health lens enlightens the need for an innovative Healthcare-based Crime Intervention Clinic embedded within the Circuit Attorney's office and the Circuit Courts to provide a holistic and public health coordinated approach to public safety outcomes in the City of St. Louis.
\$916,900	Easton Development Corporation/Young Voices With Action	Wellston Loop Mixed Use Development Project	The Wellston Loop Mixed Use Development Project is a new, mixed use space with shops, restaurants and housing that will also serve as the home for the Young Voices with Action and Easton Development Corporation corporate offices and training center. This development will be the first of its kind in over 32 years in the 5900 block of Dr. Martin Luther King Drive, in the heart of the St. Louis region and will help create a stronger, more cohesive neighborhood. This mixed use space is 16,000 square feet. The first level will have 4 white box store fronts. The 2nd floor will house a total of 8 affordable housing units. This is a valuable use of taxpayer's funds because this project services a community that is long neglected and deprived of economic development and other wraparound services. The Wellston Loop is formerly an economic corridor that generated revenue and spurred population growth in the suburbs surrounding it. It is currently a renewed focal point for major investments for new residential and mixed use communities. This development will help provide education, engagement and empowerment to the residents and businesses that are inhabitants of the area. This taxpayer-supported project will lead in redeveloping this transformative neighborhood that will also be a catalyst and spark for the continuing growth and rebirth of the Wellston Loop and the surrounding neighborhoods.

\$887,000	St. Patrick Center	Harmony Village	<p>The Harmony Village project is an innovative, intensive approach to creating housing stability, social mobility and public safety in our community. By providing affordable housing in tandem with onsite support services to community members in the most need, this project creates stability and sustainability for vulnerable Veterans, families and individuals. Through this project's funding of \$887,000, the 48 apartments at the 3600 block of Salena St. in south St. Louis City will serve the community indefinitely, providing stability and security. Harmony Village's onsite services are provided to residents by St. Patrick Center's team of professional and clinical staff.</p> <p>By offering individualized case management, onsite support, and stable, rent-controlled apartments, this project will foster self-sufficiency and life skills that clients need to improve their health and achieve housing stability. The program is unique in that it focuses intensively on addressing the social determinants of health for a population for whom lack of adequate support services contributes to high rates of utilization of crisis services, such as emergency departments. With stable, affordable housing and comprehensive support services in place, Harmony Village will decrease inappropriate use of crisis services, reduce crime, and contribute to a healthy, thriving neighborhood as chronic homelessness decreases.</p> <p>This project offers real return on investment for taxpayers. By addressing the social determinants of health while providing affordable housing, Harmony Village will effectively reduce chronic homelessness, which can lead to rapid neighborhood deterioration as crime rates rise and property values plunge. Housing individuals and families in projects like Harmony Village decreases stress on emergency services, which in turn produces significant cost-savings for communities. Reducing housing instability will relieve stress on ERs, jail, and other crisis services in the City and decrease costly hospital stays. Program participants will transition from homelessness and impoverishment to healthy, productive neighbors.</p>
\$800,000	BJC Healthcare	Hospital to Housing Program	<p>H2H provides housing to homeless patients who frequently seek shelter in hospital emergency departments. This initiative is a part of a framework of BJC programs aimed to address social determinants of health and identified health disparities. H2H addresses housing instability and access to behavioral health services.</p> <p>This program is positioned to increase access to and care coordination of effective treatment and other support services. There is a growing amount of evidence that reveals a connection between positive health outcomes and services focused on the social determinants of health – defined as conditions in place where people live, learn, work and play per the CDC. Providers and policymakers are innovating new models of healthcare delivery that incorporate housing, income supports, food security and other non-medical factors in order to address disparities in health outcomes. Reliance on crisis systems in healthcare by people who are homeless and suffer from behavioral health issues is a problem that is ripe for the innovative solution that Hospital to Housing provides. Without stable housing, individuals are more likely to lack routine healthcare check-ups, resulting in cycles of stays in emergency departments and hospitals that produce poor health outcomes at a high public cost.</p>
\$600,000	City of St. Louis Mental Health Board of Trustees	Gun Violence Response Network with Mental Health Access	<p>The St. Louis Area Violence Prevention Commission created the Gun Violence Response Network in 2020 as a step toward the objective of coordinating the community-level response to nonfatal shootings. It is a network of service providers with multiple entry points, a coordinated intake, and wraparound services for victims of violence.</p> <p>As part of VPC's Action Plan, we have convened victim service providers to identify unmet needs for victims of nonfatal shootings, to work with United Way 2-1-1 on a first of its kind gun violence victim intake, and to identify and partner with resource agencies to meet victims' needs. The most unmet needs that the committee members identified were mental healthcare, employment, basic needs (like utility assistance), funeral costs, and funds to fix property damage.</p> <p>To ensure that the community response system is comprehensive, VPC will also launch the Handle with Care program to enhance communication between law enforcement and schools when children witness and are involved in traumatic events. This notification system will ensure that schools can serve as critical connection points for youth and their families who experience traumatic events in the community that may otherwise go undetected by school staff</p> <p>Provident Behavioral Health's Access Center offers same-day \$5 therapeutic appointments provided by student therapists and overseen by a licensed, Master's-level clinical therapist, available to anyone two days a week. Our Access Center's goal is to make quality behavioral health services accessible by providing timely and affordable services to people in need. This prevents people seeking help from facing long wait times to begin services with a therapist and prevents people in crisis from relying on local emergency rooms for behavioral health issues. We seek to expand our Access Center program to include more student therapists in order to serve more people including those referred through the VPC Gun Violence Response Network.</p>

\$500,000	St. Louis University	Mobile Health Clinic	<p>To increase healthcare access and improve health outcomes in the region, Saint Louis University sets out to establish and support a mobile health clinic. To advance health equity and reach the most vulnerable and disenfranchised populations of the St. Louis region, we are proposing the establishment of a mobile health clinic. This mobile unit will serve areas where citizens lack nearby healthcare facilities, transportation to clinics, or the technology to utilize telehealth options.</p>
\$165,300	PotBangerz	Transitional Housing Facility for Unhoused Women	<p>The mobile health clinic will provide individuals the routine care necessary to avoid more costly services or visits to the emergency room. In a 2017 report from The Advisory Board Company, patients report numerous barriers to access care, including: 53% of low-income adults do not trust healthcare, 20% are deterred by high healthcare costs, 25% lack transportation to medical appointments and others report social isolation, racial or economic barriers, or language or cultural barriers. The Advisory Board Company also reports that showing up in neighborhoods of our low-income, minority, and homeless populations creates trust and found that patients were 78% more likely to self-manage their conditions after visiting a mobile health clinic. Mobile clinics are convenient, and patients do not need to have or pay for transportation. The mobile clinic will also train and engage a pipeline of healthcare providers to serve the community, while mobile nutrition and health education will bring health literacy to underserved communities.</p> <p>Mildred's Casa de Paz is designed to provide transitional housing for women experiencing homelessness. This program is targeted to all women in the St. Louis region including straight, cisgender queer and transgender women. Among the unhoused, this population is the most at-risk. Casa de Paz aims to provide a safe, nurturing space for four to six months during which time residents at Casa de Paz will be obliged to engage in job training and/or education programs.</p> <p>Mildred's Casa de Paz partners with local organizations and agencies to provide wraparound services that will assist every resident whom we house in navigating their way from homeless to housed. Services include housing referrals, job training and placement assistance, counseling, transportation, medical referrals, information regarding life skills and more. These services look different for each individual that we house because each person's experiences, strengths and needs are different. Mildred's Casa de Paz and the services that we offer address a need that isn't currently being met in our community.</p>

DISCLAIMER: Please note that this document is meant to offer a snapshot of funding. Funding totals change on a daily basis as new federal investments are secured and made to Missouri's First Congressional District. These numbers were compiled by the Office of Congresswoman Cori Bush from various federal databases, and, to our knowledge, are accurate as of date below. If you have any questions, please don't hesitate to reach out to our D.C. office.
